The Aspen Brook Report service *Identifies* and *Qualifies* Pharmaceutical, Biotechnology and Biofuel project opportunities throughout North America, Europe and Asia. These opportunities include Greenfield Facilities, Site Expansions and Facility Upgrades associated with applications in Research, Process Development, Pilot and Manufacturing.

Included in this service are customized reports for each project which reflect the expressed interest of the client whether that interest be Hardware, Software and/or Services. The customized details contained within each project report include the following;

- Company Name
- Project Location
- Company Website
- Telephone Number
- Project Summary
- Project Details
- Project Schedule
- Key Project Contacts
- Strategic Project Notes
